XDOJ 1002 - Maximum Subarray Sum

Time limit: 1000 ms
Memory limit: 256 MB

Description

Given an array of n integers, find the maximum sum of a contiguous subarray. The subarray must contain at least one element.

Input

Line 1: integer n (1 <= n <= 200000).
Line 2: n integers a_i (-10^4 <= a_i <= 10^4).

Output

A single integer: the maximum subarray sum.

Sample Input

```
5
-2 1 -3 4 -1
```

Sample Output

```
4
```
